

ABOUT THE TRAINERS

QC trainers have trained thousands of individuals across dozens of technical subjects; from GD&T and Print Reading to ISO Lead Auditing. Our trainers are experts in their respective fields, leveraging the latest information and industry-standards to support your manufacturing process improvement efforts. We ensure that after a training workshop, you will return to the workplace with the skills and competencies needed to perform at maximum effectiveness.

ABOUT QES

QES is a full-service organization that provides Metrology services such as calibration, dimensional inspection, performance testing and documentation services to customers in manufacturing and related industries.

With over 50 years of combined quality experience, QES pays special attention to customers and strives to make one-on-one relationships a priority. We stress growing in strength by helping our customers grow in strength. Incorporating accuracy and rapid turnaround times, we look forward to helping you with your Metrology laboratory needs.

PATHWAY TO

CERTIFIED QUALITY INSPECTOR

ON THE PATH...

1. Dimensional Measurement Tools

An introduction to some of the most common gages used on the shop floor.

2. Quality 101

Explore the main areas of Quality; foundational concepts and vocabulary, basic tools and methods.

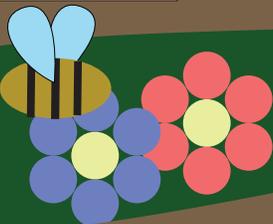

3. Blue Print Reading for Industry

A practical, application-based program, based on current ANSI standards and input from a broad cross-section of industries.

Wildlife Refuge:

MINITAB Fundamentals

Decrease the time required for statistical analysis by learning to navigate Minitab's user-friendly and customizable environment.

4. GD&T Fundamentals

The basics of the Geometric Dimensioning and Tolerancing of the ASME Y14.5M-2009 standard.

5. GD&T Advanced Concepts

A continuation of GD&T Fundamentals, introducing composite position, datum shift, and more complex GD&T controls.

Scenic Overlook: Gage Calibration Methods

This workshop offers specialized training in calibration and repair for the individual who has some knowledge of basic Metrology.

7. Certified Quality Inspector ASQ Review

This course includes classroom instruction along with group discussion, as well as sample training materials to prepare you for the ASQ exam.

8. CQI-ASQ Testing

DIPLOMA

6. Statistical Process Control

An introduction to statistics and the data collection process, including the purpose, concepts and parameters associated with control charts and process capability.

ALONG THE WAY...
